PROFESSIONAL SUMMARY

Final-year CSE undergraduate (CGPA 3.57/4.00) experienced in building complete applications: Flutter apps backed by Node.js and Firebase, React/Next.js and Django web apps, and AI features in real user flows. Strong problem-solving foundation from competitive programming, with a research paper accepted for publication. Seeking a software engineering internship.

EDUCATION

B.Sc. in Computer Science & Engineering 2022 – Present
International Islamic University Chittagong (IIUC) CGPA: 3.57 / 4.00
Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering

Higher Secondary Certificate (HSC) — Hazera Taju Degree College GPA: 5.00 / 5.00 · 2019
Secondary School Certificate (SSC) — Chandgaon NMC Model High School GPA: 5.00 / 5.00 · 2017

TECHNICAL SKILLS

Programming Languages	Dart, JavaScript, TypeScript, Python, C, C++, Java, SQL
Mobile Development	Flutter (Android & iOS), Riverpod, Provider, GetX, GoRouter, Hive, sqflite, Google ML Kit
Web Development	React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap
Backend Development	Node.js, Express, Django REST Framework, ASP.NET Core (learning), REST APIs, JWT
Databases & Cloud	MongoDB, PostgreSQL, SQLite, Firebase (Auth, Firestore, Admin SDK)
AI / ML	Gemini API, Hugging Face Transformers, PyTorch, scikit-learn
Tools & Platforms	Git & GitHub, Jest, Postman, Vite, Linux, Arduino

PROJECTS

Mobile Development

OsudSheba – AI Medication Adherence App — *Flutter · Riverpod · Node.js · Firebase · Gemini API* **GitHub**

- Bilingual (Bangla/English) app, ~16.7K lines of Dart, with reminders, Bangla voice alerts and a caregiver dashboard.
- Prescription scanning with on-device OCR and an Express API that calls Gemini 2.5 Flash to extract medicines and doses.
- Secured the backend with Firebase auth, subscription middleware, rate limiting and HMAC-verified webhooks.

AccessWatch – Flood Access Field App — *Flutter · Python · GeoJSON* **GitHub**

- Uses NISAR satellite flood data to rank cut-off communities, compare safe routes and plan rescue missions.

Transportation Management System — *Flutter · Firebase Auth · SQLite · GetX* **GitHub**

- IIUC campus bus app with an admin panel for routes and allocation, Firebase login and local storage.

Web Development

Echorithm – Personalized News Aggregator — *React · Django REST · MongoDB · Hugging Face* · Team of 3 **GitHub**

- Merges three news APIs behind a JWT-secured Django API; NLP models categorize and summarize articles.

Attendance Management System — *React · Express · MongoDB · Jest* **GitHub**

- Full-stack app with a REST API for student records, attendance logging and summaries, tested with Jest.

Other Projects

Task Manager *(Flutter, REST)* · **Spider Bot** *(C++, Arduino, team of 4)* · **Password Manager** *(C++ CLI)* **GitHub**

RESEARCH

Fairness-Aware Calibrated Gradient-Boosted Models for Leakage-Safe Chronic Kidney Disease Screening and Staging in NHANES — *Accepted for publication.*

CERTIFICATIONS

- ASP.NET Core Full Stack — CPS Academy Ongoing
- Mobile App Dev using Flutter — Ostad 2025
- Android App Dev using Flutter — EDGE 2024
- Web Development Basics — BohuBrihi 2023

LEADERSHIP & ACTIVITIES

- Press & Publication Secretary, IIUC Computer Club
- Competitive Programming — IIUCCPS 2022 – Present
- Languages: Bengali (Native), English (Professional)
